## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 50, drawn to an integrated circuit and computer system, classified in class 713, subclass 200.
- II. Claims 51 – 65, drawn to a method of authentication, classified in class 713, subclass 168.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the claimed authentication method and computer readable medium embodiment may be used within a general system requiring a form of authentication. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**Conclusion**

A shortened statutory period for reply is set to expire 1 month (not less than 30 days) from the mailing date of this communication.
